International Journal of Fracture

CONTENTS OF VOLUME 112 (2001)

Vol. 112, No. 1, 2001

Weight function for an elliptic crack in an infinite medium-II. *Shear loading*	T.K. SAHA and A. ROY	1–21
The boudary-layer effect on the crack tip field in mechanism-based strain gradient plasticity	M. SHI, Y. HUANG, H. JIANG, K.C. HWANG and MING LI	23–41
A tensile crack in creeping solids with large damage near the crack tip	JIN-YOUNG KIM and SOON-BOK LEE	43–55
A weight function technique for partially closed inclined edge cracks analysis	M. BEGHINI, L. BERTINI and V. FONTANARI	57–68
On the intersonic crack propagation in an orthotroic medium	L. FEDERICI, L. NOBILE, A. PIVA and E. VIOLA	69–85
Dynamic fracture of tungsten base heavy alloys	D. RITTEL and G. WEISBROD	87–98

Vol. 112, No. 2, 2001

Fluid jet erosion of tension-solftening materials	A.W. MOMBER	99–109
Higher order terms of the crack tip asymptotic field for a notched three-point bend beam	B.L. KARIHALOO and Q.Z. XIAO	111–128
Higher-order terms of the crack tip asymptotic field for a wedge-splitting specimen	B.L. KARIHALOO and Q.Z. XIAO	129–137
Edge cracked piezoelectric ceramic block under electromechanical impact loading	SOON MAN KWON and KANG YONG LEE	139–150
Irrevisible growth of a spherical cavity in rubber-like material: A fracture mechanics description	J. DIANI	151–161
An Analysis of a Quarter-Infinite Solid with a Corner Crack of Arbitrary Shape	HIROSHI NOGUCHI, TADATSUGU YOSHIDA and RODERICK A. SMITH	163–181

Effects of precracked specimen geometry on local cleavage fracture stress σ_f of low alloy steel	G.Z. WANG, G.H. LIU and J.H. CHEN	183–196

Vol. 112, No. 3, 2001

Periodical collinear air containing cracks in a piezoelectric material	HAO TIAN-HU	197–204
Delamination of THin Films From Two-Dimensional Interface Flaws at Corners and Edges	MATTHEW R. BEGLEY and JOSEPH M. AMBRICO	205–222
Shape sensitivity and reliability analyses of lineair-elastic cracked structures	GUOFENG CHEN, SHARIF RAHMAN and YOUNG HO PARK	223–246
Fracture mechanics solutions to spot welds	SHICHENG ZHANG	247–274
A finite-volume-energy based approach to predict the static and fatigue behavior of components with sharp V-shaped notches	P. LAZZARIN and R. ZAMBARDI	275–298

Vol. 112, No. 4, 2001

A fracture mechanics approach to high cycle fretting fatigue based on the wordt case fret concept, I	KWAI S. CHAN, YI-DER LEE, DAVID L. DAVIDSON and STEPHEN H. HUDAK, JR.	299–330
A fracture mechanics approach to high cycle fretting fatigue based on the wordt case fret concept, II	KWAI S. CHAN, DAVID L. DAVIDSON THOMAS E. OWEN, YI-DER LEE and STEPHEN H. HUDAK, JR.	331–353
Elastodynamic analysis of the Finite punch and finite crack problems in orthotropic materials	C. RUBIO-GONZALEZ	355–378
The discrete method of separation of variables for composite material problems	HOUDE HAN and ZHONGYI HUANG	379–402
